

SYSTEM

SYSTEM

System plays on the disappearance of the block to enhance its beauty. Functionality, aesthetics and design intertwine in a new concept of steel kitchen: the doors with closed cabinet show the elegance of the Liquid Metal Oxidized Steel effect finish and then reveal, once opened, the top in Fenix NTM® and the lacquered interiors. A kitchen project tailored to your spaces.

SYSTEM

Functionality at the service of the kitchen and the stunning beauty of the doors when closed seductively exchange roles. Liquid metal color door in oxidized steel. Handle in painted aluminum. Anthracite structure. Top and back in Fenix NTM®. Liquid metal color base. Stainless steel sink.
